MECHANICAL SERVICES

We deal in a variety of equipment's from the Mast to the Keel and offer complete support and service for installation, troubleshooting and repairs:

Our Engineers and Technicians provide efficient after sale service on the products supplied. We carry out new installation and retrofit as required.

Our Hydraulic Repairs and Services Division is staffed by experienced Engineers and Technician who provides efficient services for trouble shooting and repairs. We cater to Hydraulic Mooring Winches & Windlass, Steering Gear, Cranes, Cargo & Ballast Valve System.

PATEL BRASS WORKS- Engine Bearings

CUMMINS, USA - Through our principals, we are the authorized Sales & Service Center for CUMMINS. We can supply all Cummins products at very competitive rates.

New Equipment - We can source any marine equipment or spare from our global network of associates and partners for Main Engines, Auxiliary Engines, Boilers, Air Compressors, Turbo Chargers, Purifiers, Propeller, Pumps, Winches, Steering Gear.

Reconditioned Marine Equipment like Engines, Gen-sets, etc. and associate spares provide you an opportunity to save cost. Through our associates, we have access to Ship Breaking fields to source re-useable equipment and spares. Our Mechanical Engineers undertake stringent quality checks and tabulate dimension protocols. It is only after obtaining Class Inspection Certificates to meet standards set by Classification Societies that we supply the reconditioned equipment.

FLEET MANAGEMENT SYSTEM

A fully integrated modular-based, software suite designed to streamline maritime operations. BASS provides simple, effective and future proof solutions and is backed by professional consulting and implementation services and a global service support network, providing reliable technical and operational expertise anywhere via hotline, mail or internet

BASSnet: Maintenance, Procurement, Accounting, PayNet, CrewNet, Document Manager, Operations, SAFIR (SAFety Information Reporting)

SHIPYARDS & REPAIRS

With our team of naval architects, marine engineers and marine professionals have a wealth of hands-on experience in new-building, conversion and ship repair activities.

Through our network of Yards all across the globe we provide a complete solution to a ship owner in need of technical and professional experts to facilitate and expedite ship yard activities.

Our previous projects have involved conversion of Oil and Chemical Tankers, Bulk Carriers and Offshore Vessels at Middle East and Chinese ship yards.

Our focus remains OPTIMIZATION. Be it in manpower, material, minutes or money.

YOUR OWN ONE STOP SHOP
